

Title: MEALMATE DESIGN SYSTEM

Subtitle: A Design System

Name: Lathika K S

Internship Task 3

Introduction

The MealMate Design System was created to ensure consistency, usability, and scalability throughout the application. It defines the visual language, reusable UI components, and design guidelines used across all screens.

Objectives

Maintain consistency across the app.

Improve user experience.

Speed up the design process.

Create reusable UI components.

Design Principles

Design Principles

Simplicity

A clean interface with minimal distractions.

Consistency

Use the same colors, buttons, and typography across every screen.

Accessibility

Readable fonts, good color contrast, and large touch targets.

User-Friendly

Simple navigation that anyone can understand.

Color System

Color Hex Code Usage

-  Primary Green #4CAF50 Primary buttons, active icons
-  Accent Orange #FFA726 Highlights, ratings
-  Cream #FFF8E7 Background
-  White #FFFFFF Cards
-  Dark Gray #333333 Text

Typography

Font Family

Poppins

Font Styles

Style Size Weight

Heading 32 px Bold

Sub Heading 24 px SemiBold

Body 16 px Regular

Caption 12 px Regular

Button 16 px SemiBold

Spacing & Layout

Spacing

Use multiples of:

8 px

16 px

24 px

32 px

Layout Guidelines

Equal spacing between cards.

Consistent margins.

Rounded corners (16 px).

Cards aligned neatly.

Usage Guidelines

Do's

- ✓ Maintain consistent spacing.
- ✓ Use primary colors correctly.
- ✓ Use readable typography.
- ✓ Keep buttons consistent.

Don'ts

- ✗ Don't overcrowd screens.
- ✗ Don't use random colors.
- ✗ Don't mix multiple fonts.
- ✗ Don't change button styles.

Accessibility

Maintain good color contrast.

Use large touch-friendly buttons.

Use readable fonts.

Keep navigation simple.

Add meaningful icons.

Conclusion

The MealMate Design System provides a consistent and reusable foundation for the application. It improves the user experience while ensuring visual consistency and making future updates easier.
